

THE CARBON FARMING SOLUTION

A Global Toolkit of Perennial Crops and Regenerative Agriculture Practices for Climate Change Mitigation and Food Security

Eric Toensmeier

In this groundbreaking book, Eric Toensmeier argues that agriculture—specifically, the subset of practices known as “carbon farming”—can, and should be, a linchpin of a global climate solutions platform. Carbon farming is a suite of agricultural practices and crops that sequester carbon in the soil and in aboveground biomass. Toensmeier’s book is the first to bring together these powerful strategies in one place, including in-depth

analysis of the available research and, where research is lacking, a discussion of what it will take to get us there.

ERIC TOENSMEIER is the award-winning author of *Paradise Lot* and *Perennial Vegetables*, and the co-author of *Edible Forest Gardens*. Eric is an appointed lecturer at Yale University, a Senior Fellow with Project Drawdown, and an international trainer, and currently cultivates about 300 species in his urban garden.

DREAMING OF LIONS

My Life in the Wild Places

Elizabeth Marshall Thomas

A memoir tracing bestselling author Thomas’ life from her earliest days, including when, as a young woman in the 1950s, she and her family packed up and left for the Kalahari to study the Bushmen. Readers join Thomas as she returns to Africa, after college and marriage, with two young children, for the turmoil leading to Idi Amin’s bloody coup. She invites us into her family life, her writing, and her fascinating observation of animals—from elephants in Namibia to dogs in her kitchen. Originally published in hardcover as *A Million Years With You*, *Dreaming of Lions* includes a powerful new afterword by the author.

\$17.95

One of the most widely read authors on anthropology and animals, wild and domestic, **ELIZABETH MARSHALL THOMAS’** many books include *The Hidden Life of Dogs*, *The Social Lives of Dogs*, *The Tribe of Tiger*, *The Old Way*, and *The Hidden Life of Deer*.

THE KEEP YOUR BONES HEALTHY COOKBOOK

A Nutrition Plan for Preventing and Treating Osteoporosis Naturally

Laura Kelly and Helen Kelly

Mother-daughter coauthors Dr. Laura Kelly and Helen Kelly show readers a natural, effective, and safe approach to conserve bone mass and build healthy bones by eating the right foods in the right combinations. They begin with a primer on bone metabolism and the roles of individual vitamins, minerals, and enzymes in building strong bones, providing a framework so readers can work with their doctors to create personalized plans for skeletal health. The book also includes more than 100 bone health recipes ranging from sauces and small plates to soups, salads, and main dishes, plus drinks and desserts.

LAURA KELLY is a California Board-Certified Primary Care Physician and licensed practitioner of Chinese Medicine with a private practice in Topanga, CA. **HELEN KELLY** has enjoyed a 50-year career as an educator, editor, and research writer and was faculty editor at the Yale University Medical and Public Health Schools.

THE NEW WILDCRAFTED CUISINE

Exploring the Exotic Gastronomy of Local Terroir

Pascal Baudar

This extraordinary cookbook by a passionate student of nature will inspire both chefs and adventurous eaters to get creative with their own local landscapes. Baudar views his home terrain of southern California as a culinary playground, full of wild plants and and delicious foods once gathered and used by native peoples but only recently re-explored. His book combines a deep knowledge of plants and landscape with the innovative techniques of a master food preserver. Includes detailed recipes for ferments, infusions, spices, and other preparations.

PASCAL BAUDAR is a professional forager, wild food instructor, and a self-styled “culinary alchemist.” He has been featured in *Time* magazine, the *Los Angeles Times* and the *New York Times*. In 2014, he was named one of the 25 most influential tastemakers in L.A. by *Los Angeles* magazine.

THE END OF STATIONARITY

Searching for the New Normal in the Age of Carbon Shock

Mark Schapiro

Scientists have devised a new term to explain the turmoil caused by climate change: the end of stationarity. It means that our baselines for rainfall, temperature, and extreme weather are no longer relevant, making predictions based on past experience no longer possible. But climate change has upended baselines in the financial world, too, disrupting the global economy, leaving us unable to assess risk, and causing us to fundamentally re-think economic priorities. *The End of Stationarity* deftly depicts the wild, new carbon economy, and shows us how nations,

June 2016

emerging and developed, teeter on its brink. (Previously published in hardcover under the title *Carbon Shock*.)

Journalist **MARK SCHAPIRO'S** work has been published in *Harper's Magazine* and *The Atlantic*; he has reported for the PBS news magazine *Frontline/World*, *NOW* with Bill Moyers, and NPR's *Marketplace*, and is the author of *Exposed: The Toxic Chemistry of Everyday Products and What's at Stake for American Power*.

THE ART OF LEADING COLLECTIVELY

Co-Creating a Sustainable, Socially Just Future

Petra Kuenkel

Tackling current global crises—from climate change and water scarcity to energy insecurity, unfair labor practices, and growing inequality—effectively requires a new form of leadership: a collective one. But in a world of many silos how do we get people with distinct interests to work together toward a common goal? Kuenkel provides a framework for well-managed, collaborative leadership to solve complex problems, particularly those that enmesh business activities, governance, human needs, and environmental impacts.

February 2016

PETRA KUENKEL is the founder and executive director of the Collective Leadership Institute (CLI), an international not-for-profit organization building competence for collaborative change and advocating for high-quality dialogue and cooperation. Kuenkel's writing has appeared in numerous professional journals, and on her blog, *The Future of Leadership is Collective*.

THE LDN BOOK

How a Little-Known Generic Drug — Low Dose Naltrexone — Could Revolutionize Treatment for Autoimmune Diseases, Cancer, Autism, Depression, and More

Linda Elsegood

Low Dose Naltrexone (LDN) holds the potential to bring relief to millions of people suffering from autoimmune diseases, autism, chronic fatigue, depression, even cancer. Administered in small daily doses (0.5 to 4.5 mg), this generic drug is extremely affordable with few known side effects. Featuring ten chapters contributed by medical professionals on LDN's efficacy and two patient-friendly appendices, *The LDN Book* is a comprehensive resource for doctors, pharmacists, and patients, and a clarion call for further research that could help millions more.

LINDA ELSEGOOD is the founder of the LDN Research Trust, established as a Registered Charity in the UK in 2004. Diagnosed with MS in August of 2000, she started LDN therapy in December of 2003, and now has a better quality of life and hope for the future. Through the Trust, she has connected thousands of patients, doctors, and pharmacists worldwide with information about LDN.

MIRACULOUS ABUNDANCE

One Quarter Acre, Two French Farmers, and Enough Food to Feed the World

Perrine and Charles Hervé-Gruyer
Foreword by Eliot Coleman

When Charles and Perrine Herve-Gruyer set out to create their farm in an historic Normandy village, they had no idea just how much their lives would change. Neither one had ever farmed before, and each had returned to France to start a new life. The couple's account of their quest to design an almost Edenlike farm and find new ways to feed the world speaks to a future in which people live in rural communities that rely on traditional skills, local goods and services, renewable energy, and greater self-governance, but are also connected to the larger world.

Prior to founding Le Ferme de Bec Hellouin, **CHARLES HERVÉ-GRUYER** circumnavigated the globe for 22 years while operating a floating school focusing on ecology and indigenous cultures, the subject of his several books and documentaries. **PERRINE HERVÉ-GRUYER** worked as an international lawyer and head of the legal department of a major company in Asia.

A MAN APART

Bill Coperthwaite's Radical Experiment in Living

Peter Forbes and Helen Whybrow

Part memoir and part biography of Bill Coperthwaite, master yurt builder, homesteader, and social critic in the lineage of Henry David Thoreau and Scott Nearing, and his decades-long experiment in self-reliant living on a remote stretch of Maine coast. In this intimate personal account framed by Coperthwaite's sudden death and brought alive through the month-long adventure of building with him what would be his last yurt, Forbes and Whybrow explore the power,

April 2016

challenges, and complexities of mentorship: the opening of one's life to someone else to learn together, and carrying on in that person's physical absence.

PETER FORBES, co-founder of the Center for Whole Communities has created a life in conservation as photographer, writer, and storyteller about the relationship between people and place. **HELEN WHYBROW'S** life as an educator, farmer, and writer follows a career in book publishing, as an acquiring editor for W. W. Norton and the publisher of their Countryman Press imprint.

AN UNLIKELY VINEYARD

The Education of a Farmer and Her Quest for Terroir

Deirdre Heekin

Is it possible to capture a landscape in a bottle? To express its terroir, its essence of place geology, geography, climate, and soil as well as the skill of the winegrower? That's exactly what Heekin and her husband set out to do on their tiny, eight-acre hillside farm in south-central Vermont. Named one of the Best Wine Books of 2014 by the *New York Times*, *An Unlikely Vineyard* also contains an impressive amount of information on almost every aspect of gardening: from composting to trellising; from cider and perry making to old garden roses. Its gentle narrative will appeal to anyone who loves food, farms, and living well.

\$25.00

May 2016

DEIRDRE HEEKIN is the author of *In Late Winter We Ate Pears* and *Libation: A Bitter Alchemy*. Heekin and her husband live on a small farm in Vermont, where they grow the vegetables for their restaurant, Osteria Pane e Salute, and make natural wines and ciders for their La Garagista label.

THE BIO-INTEGRATED FARM

A Revolutionary Permaculture-Based System Using Greenhouses, Ponds, Compost Piles, Aquaponics, Chickens, and More

Shawn Jadrnicek with Stephanie Jadrnicek

Jadrnicek presents new insights into permaculture, moving beyond the philosophical foundation to practical farm-scale designs integrated by means of functional analysis. With every additional function each component performs, an overall design becomes more advanced and saves more energy. Each chapter offers in-depth information about designing and building bio-integrated projects including reflecting ponds, water-storage ponds, multipurpose basins, greenhouses, compost heat extraction, pastured chicken systems, aquaculture, hydroponics, and hydronic heating.

March 2016

SHAWN JADRNICKEK has worked as an organic farmer, nursery grower, extension agent, arborist, and landscaper, and is now the manager of the student organic farm at Clemson University.

RESTORING HERITAGE GRAINS

The Culture, Diversity, and Resilience of Landrace Wheat

Eli Rogosa

Rogosa introduces a menagerie of forgotten grains: diverse, landrace wheat varieties such as emmer, a strain domesticated in the Fertile Crescent, perfect for pasta and flatbreads; mirabil, the miracle wheat; durum, a high-protein, low-gluten variety; ancient einkorn, and Indian wheat, also known as shot, a rare species that is drought-tolerant and high in protein. Combining history, practical advice, folktales, and recipes for flours, breads, and beers, *Restoring Heritage Grains* invites readers to explore a rich history of healthful grains whose future is threatened by modern industrial agriculture.

\$24.95
Paperback | 288 pgs.
978-1-60358-670-2
16-page color insert
June 2016

ELI ROGOSA started The Heritage Grain Conservancy to preserve landrace wheat, educate, and ensure that future generations have access to traditional wheat from around the world that is being lost to industrial agriculture. In addition to her work in preservation, Rogosa manages an artisan bakery on her biodiverse farm.

THE ART AND SCIENCE OF GRAZING

How Grass Farmers Can Create Sustainable Systems for Healthy Animals and Farm Ecosystems

Sarah Flack

Grazing management might seem simple—just put livestock in a pasture and let them eat their fill—but the pasture/livestock relationship is actually quite complex. This book focuses on plant and soil health while covering the practical details critical for sustained success, whether setting up a new organic grazing system or improving an existing one: paddock layout; fence and drinking water access; managing livestock movement and flow; soil fertility; seeding and reseeding

pastures; and more. An essential guide for ruminant farmers who want to create grazing systems that meet the needs of not only their livestock, but also pasture plants, soils, and the larger ecosystem.

SARAH FLACK is a nationally known consultant on grazing and organic livestock. She studied Holistic Planned Grazing and pursued graduate studies on pasture management at the University of Vermont. She has written extensively and teaches workshops offering a practical approach to applying the science of grazing.

THE CLIMATE CHANGE PLAYBOOK

22 Systems Thinking Games That Teach Us How to Seek Solutions and Create Change

Dennis Meadows, Linda Booth Sweeney and Gillian Martin Mehers

Twenty-two simple interactive exercises that can help citizens better understand climate change, diagnose its causes, anticipate its future consequences, and effect constructive change. Adapted from *The Systems Thinking Playbook*, the games are specifically relevant to climate-change communications and crafted for use by experts, advocates, and educators. Illustrated guidelines walk leaders through setting each game up, facilitating it, and debriefing participants. The games are suitable for

He is the founder, editor and publisher of *Working Life*, a leading progressive blog on work and the economy, and was for 12 years the president of the National Writer's Union.

PREVIOUSLY ANNOUNCED TITLES

PERMACULTURE & CLIMATE CHANGE ADAPTATION

Inspiring Ecological, Social, Economic and Cultural Responses for Resilience and Transformation

Thomas Henfrey and Gil Penha-Lopes

For decades, permaculture practitioners have devised creative responses to changes in local climatic conditions, developing a base of knowledge and experience invaluable to global efforts to address climate change. This book seeks to bring this expertise from the margins into the centre of policy debates and mainstream action. It describes in broad terms how permaculture’s underlying philosophy and perspective on climate change complement those of formal science and indigenous

fat and cholesterol are to blame, and explains that cholesterol is, in fact, not the enemy but an integral and important part of our cell membranes.

After practicing as a neurologist and neurosurgeon in her Russian homeland, **DR. NATASHA CAMPBELL-MCBRIDE** completed her second postgraduate degree in Human Nutrition at Sheffield University, UK, and currently runs the Cambridge Nutrition Clinic. She is the author of *Gut And Psychology Syndrome* (2010), in which she explores the connection between physical state and brain function.

ANCIENT FUTURES 3RD EDITION

Helena Norberg-Hodge

A new edition of the classic 1991 book on the perils of globalization. When Helena Norberg-Hodge first visited Ladakh in 1975, she found a pristine environment, a self-reliant economy and a people who exhibited a remarkable joie de vivre. But then came a tidal wave of economic growth and development, along with a host of new social and environmental problems. In a new preface to this edition, the author highlights a rapidly growing localization movement that is working to rebuild place-based cultures and strengthen community and our connection with nature.

RUNAWAY INEQUALITY

An Activist's Guide to Economic Justice

Les Leopold

Using easy-to-understand charts and graphs, Leopold (*The Looting of America*) explains the process by which corporation after corporation falls victim to systematic wealth extraction by banks, private equity firms, and hedge funds. He reveals how financial strip-mining puts enormous downward pressure on jobs, wages, benefits, and working conditions, while boosting the incomes of financial elites. He also shows why virtually all the key issues that we face are intimately connected to rising economic inequality. Most importantly, *Runaway Inequality* calls upon us to build a common movement to tackle the sources of increasing income and wealth inequality.

HASHIMOTO'S THYROIDITIS

Lifestyle Interventions for Finding and Treating the Root Cause, 2nd Edition

Dr. Izabella Wentz

This *New York Times* Bestseller, with more than 75k copies sold since it was published in 2013, is the product of three years of research and two years of testing by Dr. Izabella Wentz, a clinical pharmacist who was diagnosed with Hashimoto's in 2009. She dispels the myth that thyroid medications are the only treatment option for people with Hashimoto's and hypothyroidism and shows how targeted lifestyle interventions allow the body to rebalance and halt the autoimmune process, allowing the thyroid to recover.

IZABELLA WENTZ, PharmD, is a clinical pharmacist who has dedicated herself to addressing the root causes of autoimmune thyroid disease since being diagnosed with Hashimoto's Thyroiditis in 2009. She is a Fellow of the American Society of Consultant Pharmacists, and holds certifications in Medication Therapy Management as well as Advanced Diabetes Care.

GMO MYTHS AND TRUTHS

A Citizen's Guide to the Evidence on the Safety and Efficacy of Genetically Modified Crops and Foods, 3rd Edition

Claire Robinson, Michael Antoniou, and John Fagan

It is often claimed that the case against genetically modified crops and foods is based on emotion, not science. It is also claimed that GM crops offer higher yields and better nutrition, are safe for health and the environment, and are needed to feed the world's growing population. This book, co-authored by two genetic engineers and a writer/researcher, exposes these claims as false, citing a significant body of evidence exposing limitations of genetic engineering technology, as well as risks to health and the environment posed by GM crops and foods.
